LANEXO® Lab Inventory, Safety and Compliance Management System

Release Notes

LANEXO® System Release Notes provide a brief insight into updates on the Mobile and Web Applications.

It uses a number logic for the releases of Mobile App and Web App, where the first digit on the version number indicates a new major release with brand new features. The second digit indicates minor releases which adapt existing features, and the last digit is intended for bug fix or security fixes only.

Intended Audience

All customers and users of the LANEXO® System.

Note

Users might have to analyze the impact for additional validation needs of the Application at their site, after the release.

Version History

Release Date: 27-August-2022

Resolved Issues

The following tables detail the new features/improvements, resolved issues such as bug fixes and security fixes in this release.
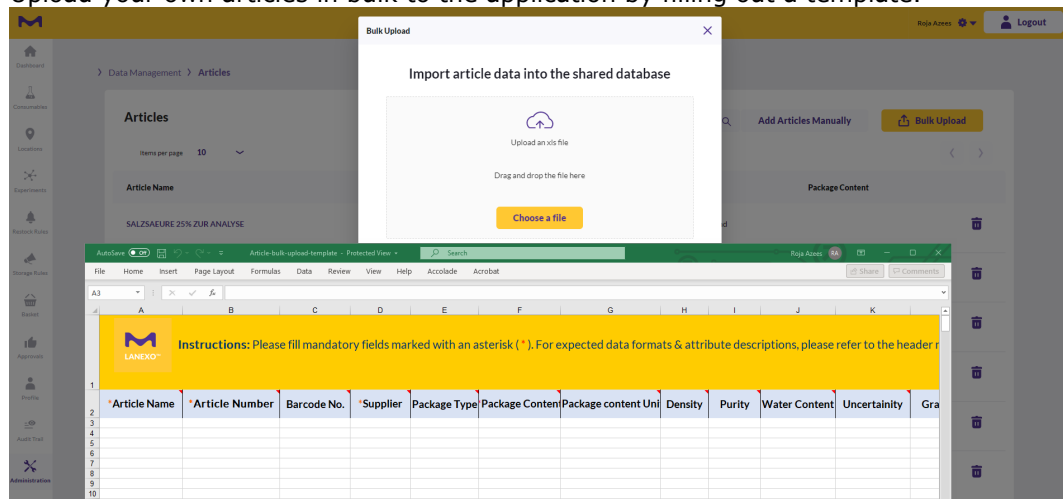

New Features / Improvements

Module	Feature Description
Administration	Data management feature to maintain the article tables in the application (update the article data, delete, and reactivate articles).

	Upload your own articles in bulk to the application by filling out a template.

Bug Fixes

Module	Description
Administration	The logout popup is shown on the welcome screen when the application launched after installation. This has been fixed.
	New module version events are being processed by the old module version's service. This has been resolved.
	The versioning had issues with the upgrades. This has been resolved.
	Previously shown release notes on the module versions were not shown. This has been fixed.
	The release date of the module versions was not displayed anymore. This has been fixed.
Audit Trail	Audit Trial events are not displayed for the existing data migrated from LANEXO v1.2. This has been fixed.
	The audit trail was missing user information such as User ID, device and access card. This has been fixed.
Dashboard	When the consumable was updated, the RFID label number was not fully shown in My Activity logs. This has been fixed.
	Unknown events shown when the modules were upgraded. This has been fixed.
	The events from Basket Module were displayed as unknown event logs in Mobile App. This has been fixed.
	Certain user activities happened in the Web App were displayed as unknown events on the My Activities. This has been resolved.
Consumables	Only 'SDS not found for passed in article' message is shown for all type of errors. This has been fixed to show the right type of errors.
	Export consumable list files were not deleted after 24 hours. This has been fixed.
	When the hamburger menu is opened in consumable, clicking the back button takes to the home screen. This issue with the navigation on mobile app has been resolved.
	The mobile app got crashed when the network got disconnected. This has been fixed.
	The expiry date was not shown for consumables with very old expiration dates. This has been fixed.
	File upload date and time format changed while testing data migration. This has been resolved.
	The barcode number field was not displayed on the consumable details page.
Experiment	When the hamburger menu is opened in consumable, clicking the back button takes to the home screen. This issue with the navigation on mobile app has been resolved.

Note for regulated customers

With the changes on the software, the validation status of the Application needs to be reestablished by the user. Please reach out to us at LANEXO@merckgroup.com to receive the IQ/OQ documentation for your validation analysis.
